With over 20 years of successful performance, it's easy to see why the LP[®] SmartSide[®] brand is one of the fastest-growing brands of siding materials in the United States.

A PIONEER OF CHANGE

LP has redefined traditional building materials with treated engineered wood products that are designed to offer game-changing durability, beauty and workability. LP is a building industry leader in a category that is shaping the way homes, outdoor building structures, and light commercial properties are being built.

BECAUSE STRENGTH IS MAKE OR BREAK

All LP[®] SmartSide[®] products are treated to the core through our proprietary SmartGuard[®] process. With four components of protection, the SmartGuard process adds strength and helps LP SmartSide products withstand impacts, freeze/thaw cycles, high humidity, fungal decay and more.

See more about how LP SmartSide products are made at YouTube.com/LPSmartSide.

OUTSTANDING IMPACT RESISTANCE

LP SmartSide

Fiber Cement

Vinyl

Testing shows that LP SmartSide strand products resist impact better than vinyl and fiber cement siding, which means they can stand up better against everything from everyday bumps to airborne storm debris. And because it doesn't break as easily as fiber cement siding, LP SmartSide strand siding is also easier to handle and install, and results in less waste.

HAIL AND WIND RESISTANCE

Third-party test results demonstrate that LP SmartSide lap siding resisted hail damage better than fiber cement and vinyl. In fact, the LP SmartSide warranty covers impacts from hail up to 1.75" in diameter. LP SmartSide lap siding is also designed to withstand tough storms with wind gusts of up to 200 miles per hour. Refer to ESR-1301, Table 2B, Lap Siding.

FOUR COMPONENTS OF PROTECTION

LP's proprietary SmartGuard[®] manufacturing process ensures that every LP SmartSide Trim & Siding product is treated with an advanced formula of adhesive resins, water-resistant waxes and zinc borate, after which a waterresistant, resin-saturated overlay is bonded to the product. The result: four components of protection against water damage, termites and fungal decay.

_

RESISTANCE TO FUNGAL DECAY AND TERMITES

Since 1996, LP SmartSide strand substrate siding has undergone brutal testing in Hilo, Hawaii. An average temperature of more than 70 degrees, high levels of humidity, and almost 170 inches of annual rainfall make Hilo's climate the perfect breeding ground for termites, moisture and fungal decay. Yet our Exterior Exposure Program continues to validate that LP SmartSide siding performs over time.

BACKED BY STRONG WARRANTIES

LP has your back with an industry-leading, transferrable limited warranty for LP® SmartSide® products: a 5-year 100% labor and material replacement warranty with a 50-year prorated limited warranty. LP® SmartSide® ExpertFinish® Trim & Siding products include an additional 15-year finish warranty.

WORKS THE WAY WOOD IS SUPPOSED TO

LP® SmartSide® treated engineered wood siding cuts out the time you spend dealing with warped and split pieces when properly stored and applied. Virtually every piece leaves the mill straight and ready to use. Plus, you'll get lengths up to 16´, which may mean fewer seams and less waste to haul off the site.

MAKES BUILDING EASIER, FASTER, MORE EFFICIENT

LP SmartSide Trim & Siding cuts with standard woodworking tools, unlike fiber cement cladding that recommends expensive diamond blades. LP SmartSide products weigh less, resist breakage during handling, and make installation more efficient. Plus, LP SmartSide products come pre-primed and ready to paint to help you save time.

LP HAS WORKABILITY NAILED

- Works and cuts like traditional wood
- Requires fewer tools
- Weighs less, easier to carry, less breakage than fiber cement
- Longer lengths may mean fewer seams and less waste
